

## Structured Finance Overview

The Structured Finance Practice Area attorneys advise clients on transactions involving asset-based credit facilities, including taxable revenue bonds, asset securitizations, and project finance.

We have advised clients on all phases of project finance funding for projects including electric cogeneration facilities and ethanol production facilities. We also have advised clients on asset-securitization facilities based on leases, accounts receivable, and other financial assets. Additionally, we have provided advice on taxable bond financings for a broad range of facilities, including industrial and medical facilities.
