

Insurance Law Overview

Attorneys in Taft's insurance practice area have extensive experience in insurance coverage, insurance regulatory, and transactional matters. Our attorneys represent clients seeking insurance defense and indemnity coverage related to all areas including environmentally contaminated property. We also represent clients in the formation and acquisition of insurance companies, in addition to advising clients with respect to regulatory and corporate matters. Our attorneys have also been very active advising clients with respect to assumption/novation reinsurance, investment law issues, redomestications, agency licensing and examination issues, and holding company act compliance.
